The benchmark isn't just to be the best in the aviation recruitment business, but the best in any business. We are dedicated to identifying and developing world-class aviation talent for temporary as well as permanent recruitment. We offer total flexibility to the client for the type of recruitment process to be adopted.

# PILOT CADET/ PILOT TRAINING PROGRAM

Making the decision to become a pilot is an exciting move. With global demand for airline pilots reaching new heights, there has never been a better time to choose a career as a professional pilot – your decision to become a professional pilot may be one of the most important decisions you ever make.

Every pilot agrees that taking the first step towards becoming a professional aviator is a decision they never regret.

**The absolute first step** should be to shortlist and choose a flight-training organization with good credentials. It should also be one that can provide flight-training to a level of excellence which will enable you fulfil your ambitions in your aviation career.

The syllabus is standard worldwide with a few minor changes to fulfill regional and regulatory requirements.

Pilot licenses issued by EASA/ICAO/FAA contracting states worldwide are acceptable in all other EASA/ICAO contracting states.

**The second step** is to differentiate the excellent from the average. Reputed airlines would look at a training organization's quality and track record, its flight instructors, the syllabus, the equipment and the infrastructure.

**The third step** whilst making this important career decision involves the prospective candidate to discuss with family and friends and then review your decision again. If you are highly motivated, inquisitive, talented, a team player who can work alongside a dedicated team. And you have a passion for aviation, then proceed on reading on. We hope it will give you an understanding of the world of flight-training and the steps that will place you on the path to achieve your ambition

# PILOT CADET/ PILOT TRAINING PROGRAM

Victory Aviation Company Limited offers, CAAV approved Frozen ATPL + CPL + ME / IR with 200 Hours of actual flying on TECNAM aircraft with Garmin engines and 20 hours on simulator - Rach Gia and Ho Chi Minh with Viet Flight Training (Vietnam Airlines owned Flight Training Academy).

# PILOT LINE TRAINING PROGRAM

Pilot Cadets, CPL Cadets, enroll in VIETJET – 1500 Hours Line Training Program on Airbus A320, in mutual association with VIETJET TRAINING ACADEMY.

Today being a pilot is a very demanding job. Pilots need to manage the flights in respect of many rules; the most important one is safety. Airlines also require that their pilots be efficient, optimizing all the costs when possible. You need to be a good manager, from the beginning of your training, to be ready to become a team leader when you achieve your captain upgrade. Learning to manage human resources, interfaced with the technologies, the environment, and different cultures, is one of the most challenging and adventurous aspects of our work.

We are delighted to offer you to give you the best chance to succeed with your target.

**Fly to join your world**

Line training program for pilot helps you increase the number of hours flown, gain experience in the actual aircraft and get the better job.

In this aviation industry, particular for each pilot cadet, their life is HOURS, each pilot cadet requires HOURS to grow, if they are having HOURS with them, they are in demand, they are being absorb by the airline companies worldwide.

Line Training program is dedicated to low hour pilots who recently got their Frozen ATPL + CPL ME IR license and need professional guidance through the start of a pilot career. Throughout recent years VICTORY AVIATION COMPANY LIMITED has assisted lots of young pilots upgrading their competence in aviation – now it's time for you.

## SUMMARY

**We are highly selective about our flight training partners because we believe that the organization and its flight and ground instructors, without exception must be highly motivated and passionate about what they do. They must be committed to helping our cadets realize their potential to become professional pilots.**

Our strength lies in our people, therefore Victory Aviation Company Limited (VACL) places immense importance on the person and in identifying people with all the attributes inherent in a professional. We ardently believe that a pilot's attitude will be his or her most asset, or a greatest liability, so we first look for true professionals and then good pilots. Aviation experts worldwide agree that often a crash could have been averted if the aircraft had a pilot with a superior training. In other words, pilots must realize that most of the tools they need to be a skillful, exceptionally safe pilot, are within them. Descriptors such as conservative, cautious, inquisitive, proactive, pragmatic, decisive and informed would-be good indicators of the type of candidates we welcome.

**Wishing you good luck and tailwinds on your journey!**
